

Below is a list of over two dozen web sites that I have either created myself or have inherited from another source to maintain. I have also given you a small summary of the site and its purpose for your reference.

## Designed and Maintain Sites:

[www.raatz.com](http://www.raatz.com) - This is my main business web site.

[www.pattybsoldme.com](http://www.pattybsoldme.com) - This is for another Realtor (Patty Betzler) I work with that has this site not only to utilize the MLS search features, but also to display and promote the apartment complexes they own and rent.

[www.glaciercourapt.com](http://www.glaciercourapt.com) - This is the second site I've setup for Patty Betzler (see [www.pattybsoldme.com](http://www.pattybsoldme.com)) This site is for a large apartment complex that they own in Texas City, TX. All the information is sent to me and I have created and maintained the site from its inception.

[www.raatz.us](http://www.raatz.us) - This is my family web site

[www.scottysbit.com](http://www.scottysbit.com) - This site I did pro-bono for the family of one of the 35W bridge collapse victims

[www.ssidentalcenter.com](http://www.ssidentalcenter.com) - This is for my dentist in Monticello

[www.elegantentrees.com](http://www.elegantentrees.com) - This is a one page site promoting their catering business. You would consider this an online business card with a kick.

[www.albertvillebodyshop.com](http://www.albertvillebodyshop.com) - We designed this site utilizing the service of a graphic designer to help with the logo and color designs. This site is updated monthly with new coupon specials.

[www.centrasota.com](http://www.centrasota.com) - This has been the largest web project to date. I sub-contracted a web developer and graphic designer to put the site together and I worked as the project manager for the site project. I currently maintain all aspects of this site for the client.

[www.freshlymaidinc.com](http://www.freshlymaidinc.com) - This is another small site enabling my clients to refer people to for resource information.

[www.fadcpmn.com](http://www.fadcpmn.com) - This site was designed from scratch and the content was created by us as well with input from the client.

[www.mjsgalleryphotography.com](http://www.mjsgalleryphotography.com) - This site was designed from scratch and is the only one that has incorporated music into the site design.

[www.mysticalwillow.com](http://www.mysticalwillow.com) - Technically, I inherited this site, but there has been so many renovations done that it barely looks like the original. This site incorporates the use of Flash Player for her image slide-shows.

[www.septicresource.com](http://www.septicresource.com) - This site was created as a resource location for individuals in the septic inspection industry. This was designed using a template and modified to the colors, images and logo the client needed.

[www.aginformationdata.com](http://www.aginformationdata.com) - Here is an example of a **Joomla** site I did recently for a client. He is now maintaining the site himself with a partner, but the initial design and setup was done by me using a free Joomla template.

[www.scrubsbyvianne.com](http://www.scrubsbyvianne.com) - This site started with a free standard HTML template that I then modified and customized to ViAnne's colors and content.

**Inherited Sites I Maintain:**

[www.zachhomes.com](http://www.zachhomes.com) - This is for the Realtor Zach Adams. I have done some extensive improvements and additions to this site since I inherited it.

[www.rockhart.com](http://www.rockhart.com) - This is a site for a company that raises Irish Wolf Hounds. Her original site developer was in Germany where she is from originally

[www.wrightsherburnerealty.com](http://www.wrightsherburnerealty.com) – I inherited this site. The site changes will be minor involving new agents and a few design changes.

[www.accentpainting.biz](http://www.accentpainting.biz) - I helped this client move hosting providers and then do updates on this site.

[www.buffalocommunitytheater.org](http://www.buffalocommunitytheater.org) - This site was built in conjunction with another developer using **Joomla**. I have been volunteering time to maintain the content when necessary.

[www.simplepure.com](http://www.simplepure.com) - This client's site was in need of updating and enhancing the site with necessary tags utilized by search engines to "find" the site.
